

Cell Technology Completes the Ownership of iSurfJanus

Enable intelligent IP network and security solutions for Japan

Hong Kong, March 12, 2009 – Cell Technology (Cell), a network & security technology provider headquartered at Hong Kong announced today that Cell has successfully completed the purchase of iSurfJanus product rights from Takachiho Koheki (TK), its Japanese partner.

The iSurfJanus, a Japanese brand product of the Multi-WAN Service Gateway, owned by TK since 2004, has successfully penetrated into the major telecommunication service providers in Japan. “The iSurfJanus products and its technology with high performance and quality proven have been well recognized by Japanese carriers. This transaction can expand our businesses with a complete range of network & security product solutions, and enable us to continue to develop innovative security & resiliency applications for the Japanese carriers’ market.” Mr. Derek Lee, CEO of Cell said. “Cell has a long-term partnership with TK from providing technology consultancy service to maintaining iSurfJanus product development since 2004. This transfer will enable Cell to have a competitive advantage by integration of Cell’s Internal Protocol (IP) & security technologies to meet market requirement.” Mr. Keiichi Obara, Managing Executive Officer of TK, commented on this transaction.

Cell Technology will continue to market and support this Janus product for Asia Pacific and worldwide customers. Takachiho Koheki is continuously one of the key distributors to provide sales and maintenance services to corporate customers in Japan.
