

Cell Technology and STAR-NET Enter Partnership

Hong Kong, 1 April, 2013 – Cell Technology (Cell), a network & security technology provider headquartered in Hong Kong announced today that business partnership is formed with STAR-NET in Japan. STAR-NET resells and markets Cell Janus, Multi-WAN Service Gateway and its product solutions in Japan. STAR-NET was found in 1986 by representative companies in Japan: Sumitomo Electric, Suntory, Daikin, Takeda pharmaceutical and etc., as a Telecom WAN service and network integration & solution provider for Telecommunication networks in Japan.

“Cell Janus, one of our key network product solutions with multi-homing technologies has successfully penetrated into most of the major telecommunication service providers, government networks and large enterprises in Japan. We have launched our new Cell Janus ZX product portfolio with 10G network solutions this year to target for multi-carrier solution, large enterprises with IPv6 solution and Data Centers with global load-balancing solution. We are continuing to develop innovative network applications to fulfill high performance and quality of Japanese’s IP network requirements,” said Derek Lee, Cell CEO. “STAR-NET recognized our Cell products with professional and high quality on hardware and software technologies. With our new product release, STAR-NET may offer Cell product solutions to her end customers to optimize the IP broadband WAN bandwidth and applications.” said Inada Yoshinobu, Cell Country Manager of Japan.

“We offer IT network technologies and services for our telecommunication customers in Japan. We are very glad to resell and market Cell product solutions to provide a multi-carrier solution to our clients. By selling Cell Janus with her complete product portfolio, we may continue to expand our customer bases in Japan” said Mr. Katsu, Director of STAR-NET.
