

2011-04-15 Product EOL/Rename Notice

Cell UTM-20/50 EOL

Cell UTM-100 Rename to IPS-100E

This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced/or released into the market.

Cell Product

Cell UTM-20/50 Models

UTM-20 and UTM-50 models will be EOL (End of Life) by end of April 2011. Those models will be replaced by Cell IPS-100/100E

Cell IPS-100E Model

Current UTM-100 model will be renamed to IPS-100E by end of April 2011. The product functionality and version will remain unchanged

Overview

Cell Intrusion Prevention System (IPS) is a next-generation of network security appliance with Cell's proprietary Custom Real-time Intelligent Operation System (CRIOS) and Intelligent Packet Processing Engine (IPPE) developed and embedded into an appliance system. It can take one step ahead the hacker penetration and prevent any attacking packets included notorious spywares, intrusion attacks, virus/worms and tunneling software to reach your network in real-time basis.

Cell IPS Product Models

1. Cell UTM-20/50 models will be EOL and replaced by Cell IPS-100/100E product series to meet the higher system performance.
2. Cell UTM-100 models will be renamed to IPS-100E to inline with our IPS product models. The current product features, functionality and version will remain unchanged.

This product release update highlights the new features, enhancements or bug fixes that have been added to Cell IPS since last release. This document to partners or customers is for marketing purpose and the details are in our Cell IPS product datasheets or release notes that can be downloaded in Cell e-TAC.
