

2009-03-31 Product Release Update
Cell IPS v3.2.2

This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced/or released into the market.

Cell Product

Cell IPS Models

IPS-100, IPS-200, IPS-500, IPS-710, IPS-1000P

Overview

Cell Intrusion Prevention System (IPS) is a next-generation of network security appliance with Cell's proprietary Custom Real-time Intelligent Operation System (CRIOS) and Intelligent Packet Processing Engine (IPPE) developed and embedded into an appliance system. It can take one step ahead the hacker penetration and prevent any attacking packets included notorious spywares, intrusion attacks, virus/worms and tunneling software to reach your network in real-time basis. Cell IPS supports 3000 pre-defined signature rules to protect your networks and with on-line Signatures Update (SU)/Knowledge-Base (KB) automatically from Cell Security Service Centre (SSC) to defense against any latest threats and intrusion attacks.

This product release update highlights the new features, enhancements or bug fixes that have been added to Cell IPS since last release. This document to partners or customers is for marketing purpose and the details are in our Cell IPS product datasheets or release notes that can be downloaded in Cell e-TAC.

Cell IPS v3.2.2 Release

1. To support multiple of operation modes by Cell's Multi-Engine technology.
2. To enhance Command Line Interface (CLI) with advance operations.
