This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced/or released into the market.

Cell Product

Cell Janus Models

CX-2, CX-3, RX-3, RX-4

TX-4, TX-5, TX-6

Overview

Cell Janus is a Multi-WAN Service Gateway with Cell's proprietary Custom Real-time Intelligent Operation System (CRiOS) and unique Intelligent Packet Processing Engine (IPPE) developed and embedded into an appliance system for worldwide market. It provides sophisticated capabilities of link dynamic load balancing with inbound and outbound, stateful firewall, intelligent NAT (iNAT) and intelligent routing capability, QoS (Quality of Service), link monitoring and automatic failover that keep business connected even during link failure and support triple-play services at a quality level for enterprises and service providers.

This product release update highlights the new features, enhancements or bug fixes that have been added to Cell Janus since last release. This document to partners or customers is for marketing purpose and the details are in our Cell Janus product datasheets or release notes that can be downloaded in Cell e-TAC.

Cell Janus v4.1.1 Release

1. To fix the minor bugs from last major version.
