

2009-10-15 New Product Announcement

iSurfJanus TX2

This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced/or released into the market.

Cell Product

iSurfJanus TX2-5 (v4.x)

- 1Gbps, support up to 5 WAN links
- Replace current TX model (TX will be EOL in Q4/09)

iSurfJanus TX2-8 (v4.x)

- 1.2Gbps, support up to 8 WAN links
- Support 4 SFP fiber interfaces
- New model for high end market

Cell NetsVision, iCMS-Janus

- Complete & Centralized Management Platform for Janus

* All TX models are certified by Japan JQA/VCCI in 2009.

Overview

iSurfJanus is a next-generation of multi-WAN IP service gateway with Cell's proprietary Custom Real-time Intelligent Operation System (CRiOS) and unique Intelligent Packet Processing Engine (IPPE) developed and embedded into a hardware appliance system. It supports the performance up to 1.2Gbps and 8 WAN links. It provides sophisticated capabilities of link dynamic load balancing with inbound and outbound, stateful firewall, intelligent NAT (iNAT) and intelligent routing capability, QoS (Quality of Service), link monitoring and automatic failover that keep business connected even during link failure and support triple-play services at a quality level for large enterprises and service providers.

New Features

iSurfJanus will support the following new features in newer release (4.x)

- High Availability Inbound Load Balancing
- Class-based of IP Traffic Control and Bandwidth Management for Triple-Play Services
- Outbound Load Balancing with Proximity
- Inbound Load Balancing with Auto Geographic

This document to partners or customers is for marketing purpose and the product details are referred to our datasheet or specification that can be downloaded in Cell e-TAC.

Cell Support Centre

For any Cell partner or direct customer technical support, the **Cell e-TAC (On-Line Technical Assistance Centre)** is located at <http://support.cell-technology.net> for you to download any technical documentation, product information and latest product software release for our product installation and maintenance.
