

2010-05-31 Product Release Update
Cell UTM v4.1.0

This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced/or released into the market.

Cell Product

UTM-100 v4.1.0

Overview

Cell UTM-100 is a complete network security hardware appliance supports 100Mbps system performance and all-in-one of security features such as Gateway Anti-Virus (AV), Intrusion Detection & Prevention (IDP), Internet Application Management and Control and Web Filtering network protection. It targets for SME markets and managed-UTM service by MSSP/SOC service providers. Cell UTM supports all signature rules with on-line Signatures Update (SU)/Knowledge-Base (KB) automatically from Cell Security Service Centre (SSC) to defense against any latest threats and intrusion attacks.

This product release update highlights the new features, enhancements or bug fixes that have been added to Cell UTM since last release. This document to partners or customers is for marketing purpose and the details are in our Cell UTM product datasheets or release notes that can be downloaded in Cell e-TAC.

Cell UTM-100 v4.1.0 release :

- Support latest Anti-Virus v3.x signatures with superior performance in virus scanning and prohibition.
- Support UTM device self-monitoring.
