

2009-03-31 Product Release Update  
Cell NetsVision, iCMS-IPS v1.1.0

This product release update notice serves as a formal marketing communication of Cell Technology to inform partner/or customer that Cell product(s) has been enhanced to a newer version and released into the market.

### Cell Product

#### Cell NetsVision Uni-Platform

Cell IPS Centralized Management System – iCMS-IPS

### Overview

Cell NetsVision, an intelligent Cell Management System (iCMS) is the complete, comprehensive and centralized management platform to monitor, control and manage for all Cell products including Cell IPS, UTM, CMC, Janus and NetsAccess such as routers, IP switches & other IP network devices in a highly performance and scalability purpose.

This product release of Cell NetsVision, iCMS-IPS centralized management platform highlights the new features, enhancements or bug fixes that have been added to Cell iCMS-IPS since last release. This document to partners or customers is for marketing purpose and the details are in our Cell NetsVision product release note that can be downloaded in Cell e-TAC.

### Cell NetsVision, iCMS-IPS v1.1.0 Release

1. To support remote management, sensor configuration and policy provisioning for Cell IPS/UTM.
2. To enhance reporting management and schedule email distribution.
3. To enhance Cell IPS iPlug-in with robust performance.
4. To fix all minor bugs in last release.
