Cell Product

Cell iCMS-SWG

Complete & Centralized Management Platform for Network Access Products

Overview

Cell NetsVision, an intelligent Cell Management System for Cell Network Access Products (iCMS-SWG) is the complete, comprehensive and centralized Element Management System (EMS) platform for operation, administration and management (OAM) of Cell network access products in highly performance and scalability purpose. This EMS provides mainly for network visualization, fault monitoring, performance, configuration and security managements for service providers.

This product release update highlights the new features, enhancements or bug fixes that have been added to Cell Janus since last release. This document to partners or customers is for marketing purpose and the details are in our Cell Janus product datasheets or release notes that can be downloaded in Cell e-TAC.
