#### Overview

iSurfJanus, a Japanese brand product of Cell's Multi-WAN IP Service Gateway with Cell's proprietary Custom Real-time Intelligent Operation System (CRiOS) and unique Intelligent Packet Processing Engine (IPPE) developed and embedded into an appliance system for Japanese market. It provides sophisticated capabilities of link dynamic load balancing with inbound and outbound, global load balancing, stateful firewall, intelligent NAT (iNAT) and intelligent routing capability, QoS (Quality of Service), link monitoring and automatic failover that keep business connected even during link failure and support triple-play services at a quality level for enterprises and service providers.

This new product release update highlights the new features, enhancements or bug fixes that have been added to iSurfJanus since the last release. This document to partners or customers is for marketing purpose and the details are in our iSurfJanus product datasheet or release note that can be downloaded in Cell e-TAC.

#### New Features

iSurfJanus EX will support the following new features in newer release (v4.3.x)

- With extremely high MTBF and robust performance of industrial-graded hardware appliance
- Support 200Mbps system performance and inline all the features with other models
