iSurfJanus CX/EX/RX4/TX2
日本でのブランド名：<u>Multi-WAN Service Gateway</u>
は現在、Cell Technology 社の Janus 製品です。

Overview

iSurfJanus, a Japanese brand product of Cell's Multi-WAN IP Service Gateway with Cell's proprietary Custom Real-time Intelligent Operation System (CRiOS) and unique Intelligent Packet Processing Engine (IPPE) developed and embedded into an appliance system for Japanese market.   It provides sophisticated capabilities of link dynamic load balancing with inbound and outbound, global load balancing, stateful firewall, intelligent NAT (iNAT) and intelligent routing capability, QoS (Quality of Service), link monitoring and automatic failover that keep business connected even during link failure and support triple-play services at a quality level for enterprises and service providers.

This new product release update highlights the new features, enhancements or bug fixes that have been added to iSurfJanus since the last release.   This document to partners or customers is for marketing purpose and the details are in our iSurfJanus product datasheet or release note that can be downloaded in Cell e-TAC.

New Features
iSurfJanus RX4 and TX2 will support the following features in newer release (v4.3.2)
1. To support higher bandwidth up to 600Mbps for RX4 and 1.6Gbps for TX2 models
